

Table of Contents

1	Fundamentals	
1.1	Communication Technologies	4
1.1.1	Print Media	4
1.1.1.1	Books	5
1.1.1.2	Magazines	5
1.1.1.3	Newspapers	6
1.1.1.4	Brochures	6
1.1.1.5	Other Printed Media	6
1.1.2	Electronic Media	6
1.1.3	Multimedia	7
1.1.4	Distribution and Market Volume	8
1.1.5	Trends and Scenarios for the Future	10
1.1.5.1	Changes in the Traditional Printing Sector	10
1.1.5.2	Integration of New Media	11
1.2	Production of Print Media	14
1.2.1	Layout, Typography, Graphic Design	15
1.2.1.1	Type	15
1.2.1.2	Typography	19
1.2.1.3	Graphic Design	23
1.2.2	Prepress	24
1.2.3	Printing	29
1.2.4	Postpress/Finishing	33
1.2.5	Digital Production Equipment in the Workflow	35
1.2.6	Premedia	38
1.3	Printing Technologies	40
1.3.1	Overview of Printing Technologies	40
1.3.2	Printing Technologies with a Printing Master	41
1.3.2.1	Letterpress/Flexographic Printing	45
1.3.2.2	Gravure Printing	48
1.3.2.3	Lithography/Offset Printing	52
1.3.2.4	Screen Printing	55
1.3.3	Printing Technologies without a Master (NIP Technologies)	58
1.3.3.1	Electrophotography	60
1.3.3.2	Ink Jet	63
1.3.3.3	Printing Systems based on Non-Impact Printing Technologies	65
1.4	Print Quality	68
1.4.1	Color/Color Theory	68
1.4.2	Color Image Composition	79
1.4.3	Halftone Process/Screening	90
1.4.4	Quality Control/Measurement Techniques	99
1.4.4.1	Color Measurement	100
1.4.4.2	Color Register	108
1.4.4.3	Measurement of Gloss	110
1.4.5	Surface Finishing	111
1.4.5.1	Characteristics of Surface Finishing	111
1.4.5.2	Surface Finishing Techniques	113
1.5	Print Media Materials	117
1.5.1	Substrates	117
1.5.2	Printing Inks	130
1.5.2.1	Structure and Requirements	130
1.5.2.2	Offset Printing Inks	137
1.5.2.3	Gravure Printing Inks	137
1.5.2.4	Flexographic Printing Inks	139
1.5.2.5	Letterpress Printing Inks	139
1.5.2.6	Screen Printing Inks	139
1.5.2.7	Pad Printing Inks	140
1.5.2.8	Inks for Non-Impact Printing Technologies	140
1.5.3	Varnishes	142
1.6	Printing Presses and Printing Systems	145
1.6.1	General Structure	145
1.6.2	Designs for Multicolor Printing	150
1.6.2.1	Sheet-fed Printing Presses	150
1.6.2.2	Web-fed Printing Presses	154
1.6.2.3	Packaging Printing Presses	159
1.7	Drying Methods	166
1.7.1	Physical Drying (Absorption)	166
1.7.1.1	Infrared (IR) Drying	169
1.7.1.2	Evaporative Drying	170
1.7.1.3	Problems in Practical Operation	172
1.7.2	Chemical Drying/Curing	173
1.7.2.1	Oxidation	173
1.7.2.2	UV Drying/Curing	173
1.7.2.3	Electron Beam Drying/Curing (EBC)	175
1.7.3	Auxiliary Drying Techniques	176

1.7.3.1	Powder Spraying	176	2.1.4.5	In-line Print Quality Measurement and Control Systems	312
1.7.3.2	Silicone Application	176	2.1.4.6	The State of the Art in Remote Control, Measurement and Control Systems	317
1.7.4	Measuring Techniques	176	2.1.5	Automation in Print Media Production ...	319
1.8	Products of Print Finishing	180	2.1.5.1	Wash-up Procedures	320
1.9	Aspects of Management and Business Models	185	2.1.5.2	Plate Changing	321
1.9.1	Production Options and Business Models	185	2.1.5.3	Sheet Size and Paper Travel Adjustment ...	323
1.9.1.1	The Value-added Chain (Production Depth and Product Range)	186	2.1.5.4	Ink Feed Presetting in the Printing Unit ...	325
1.9.1.2	Financing and Distribution Models	188	2.1.5.5	Ink and Dampening Solution Supply	328
1.9.1.3	Media Business as a Technical Service	190	2.1.5.6	Makeready for Print Production	329
1.9.2	Coordination of Workflows	190	2.1.6	Examples of Offset Printing Presses and Production Systems	333
1.9.2.1	Lean Production and Lean Management ...	190	2.1.6.1	Sheet-fed Offset Printing Presses	333
1.9.2.2	Tracking	192	2.1.6.2	Web-fed Offset Printing Presses/Systems ...	338
1.9.2.3	Quality Assurance	195	2.1.7	Potential for Further Development	354
1.9.3	Production Layout	197	2.1.7.1	Print Quality	354
1.9.3.1	Material Flow	197	2.1.7.2	Offset Printing Process	355
1.9.3.2	Capacity Planning	199	2.1.7.3	Drying	356
1.9.3.3	Personnel Deployment and Supply of Utilities	200	2.1.7.4	Automation	357
2	Printing Technologies with Permanent Printing Master		2.2	Gravure Printing	360
2.1	Offset Printing	206	2.2.1	Process	360
2.1.1	Basic Principles	206	2.2.1.1	Gravure Cylinder Manufacture	360
2.1.1.1	Process	206	2.2.1.2	Gravure Cylinder Imaging	363
2.1.1.2	Printing Plates, Printing Ink, Dampening Solution	209	2.2.1.3	Storage and Changing of Gravure Cylinders	366
2.1.1.3	Inking Unit, Dampening Unit, Printing Unit	213	2.2.1.4	Impression Roller	368
2.1.1.4	Print Quality	223	2.2.1.5	Inking Unit and Doctor Blade	369
2.1.2	Sheet-fed Offset Printing	226	2.2.1.6	Drying	372
2.1.2.1	Paper Travel	226	2.2.1.7	Circumferential and Lateral Register	372
2.1.2.2	Feeders	229	2.2.1.8	Magazine Turner Bars Superstructure	374
2.1.2.3	Printing Units	237	2.2.1.9	Gravure Printing Folders	374
2.1.2.4	Sheet Reversal/Perfecting	244	2.2.1.10	Reel Stand	377
2.1.2.5	Delivery	247	2.2.2	Examples of Gravure Printing Systems ...	377
2.1.2.6	Drying	251	2.2.3	Gravure Printing in the Packaging Industry	384
2.1.2.7	Print Enhancement and In-line Finishing ..	254	2.2.4	Potential for Further Development	391
2.1.2.8	Press Architecture (Special Designs)	257	2.3	Letterpress Printing	395
2.1.3	Web-fed Offset Printing	260	2.3.1	Basic Principles	395
2.1.3.1	Press and System Concepts (Components) ..	260	2.3.2	Letterpress Printing (Process and Applications)	396
2.1.3.2	Web Travel (Infeed and Further Processing)	276	2.3.3	Flexography	397
2.1.3.3	Printing Unit	281	2.3.3.1	Process	397
2.1.3.4	Folders and Print Product Variations	286	2.3.3.2	Printing Unit	401
2.1.3.5	Newspaper Printing	292	2.3.3.3	Examples of Flexographic Printing Presses	404
2.1.4	Remote Control, Measurement and Control Technology/Systems	297	2.3.4	Potential for Further Development	407
2.1.4.1	Press Remote Control Systems	298	2.4	Screen Printing	409
2.1.4.2	Color Measurement and Control Systems ..	300	2.4.1	Basic Principles/Process	409
2.1.4.3	Register Measurement and Control	307	2.4.1.1	Platemaking	410
2.1.4.4	Inspection of the Printed Image	308	2.4.1.2	Printing Process	414
			2.4.2	Applications	416
			2.4.2.1	Screen Printing on Flat Surfaces	416
			2.4.2.2	Screen Printing on Curved Surfaces	417

2.4.3	Examples of Machinery	417	3.1.7.3	Letterpress Printing, Flexography	497
2.4.3.1	Equipment and Machinery for Flat-bed Screen Printing	417	3.1.7.4	Gravure Printing	498
2.4.3.2	Screen Printing Machinery for Printing on Curved Surfaces	418	3.1.7.5	Screen Printing	498
2.4.3.3	Rotary Screen Printing Presses	418	3.1.8	Color Management	499
2.4.4	Potential for Further Development	422	3.1.8.1	Processes for the Correction of Tone Values and Color Values	500
2.5	Special Printing Technologies and Product Specific Applications	423	3.1.8.2	Offset-Gravure Conversion	501
2.5.1	Security Printing	423	3.2	Digital Prepress	503
2.5.1.1	Bank Notes	423	3.2.1	Structure of Digital Printed Products	503
2.5.1.2	Postage Stamps, Stamps	429	3.2.1.1	Technological Capabilities and Workflows	503
2.5.1.3	Documents	432	3.2.1.2	Digital Description of the Printed Page	505
2.5.2	Business Forms Printing	433	3.2.1.3	Digital Screening Processes	508
2.5.3	Label Printing	438	3.2.2	Quality Requirements	513
2.5.4	Pad Transfer Printing	442	3.2.2.1	Input and Output Resolution	514
2.5.4.1	Printing Process	443	3.2.2.2	Transferable Tonal Range	516
2.5.4.2	Cliche Making	445	3.2.2.3	Dot Shape	517
2.5.4.3	Pad, Ink, Object Holding Device	447	3.2.2.4	Tone Value Influences in Printing	518
2.5.4.4	Multicolor Pad Transfer Printing, Applications	447	3.2.2.5	Color Management Profiles	519
3	Prepress		3.2.2.6	Image-dependent Effects and Corrections	519
3.1	Conventional Prepress	452	3.2.3	Digital Photography	520
3.1.1	Word Processing, Typesetting	453	3.2.3.1	Origins of Digital Photography	520
3.1.1.1	Typesetting Procedure	453	3.2.3.2	Image Scanning with Digital Cameras	521
3.1.1.2	Manuscript	454	3.2.3.3	Demands on the Resolution	523
3.1.1.3	Text Input	454	3.2.3.4	Special Features of Digital Cameras	524
3.1.1.4	Word Processing and Typesetting	456	3.2.3.5	Digital Photography and Color Management	525
3.1.2	Text Output for the Production of Film/Plate	458	3.2.4	Digitizing Originals (Scanner)	525
3.1.2.1	Designs of Output Devices	458	3.2.4.1	Scanner Designs and Models	526
3.1.2.2	Requirements on Films	460	3.2.4.2	Drum Scanners	529
3.1.3	Photomechanical Image Processing/ Reproduction	461	3.2.4.3	Flat-bed Scanners	529
3.1.3.1	Use and Importance of Analog Reproduction	462	3.2.4.4	Digitizing and Redigitizing	531
3.1.3.2	Principles, Tasks of Photomechanical Reproduction	464	3.2.5	Sheet Assembly and Imposition	532
3.1.3.3	Materials	469	3.2.5.1	Page Make-up and Sheet Assembly	533
3.1.3.4	Machines and Devices used in Reproduction Technology	469	3.2.5.2	Full-Sheet Output	533
3.1.3.5	Production of Film Copies for Single-Color Printing	474	3.2.5.3	Imposition through Software	534
3.1.3.6	Production of Film Copies for Multicolor Printing	479	3.2.5.4	Imposition Workflows	537
3.1.4	Electronic Reproduction Technology (Repro Scanner)	482	3.2.6	Raster Image Processor (RIP)	540
3.1.5	Assembly	485	3.2.7	Storage Media	545
3.1.5.1	Page Make-up	485	3.2.8	Networks	547
3.1.5.2	Sheet Assembly	487	3.2.8.1	Network Concepts and Components	547
3.1.6	Proofs/Test Print	490	3.2.8.2	Working with Networks	549
3.1.7	Platemaking and Quality Control	493	3.2.9	Data Formats	550
3.1.7.1	General Information	493	3.2.10	Color Management	555
3.1.7.2	Offset Printing	494	3.2.10.1	The Image Reproduction Process using Color Management	555
			3.2.10.2	Production of Color Profiles	555
			3.2.10.3	Structure of Color Profiles	557
			3.2.10.4	Connection of Color Profiles	558
			3.2.10.5	Rendering Intent	560
			3.2.10.6	Color Management and the Production of Proofs	561
			3.2.10.7	Color Management for Images on the Internet	562
			3.2.10.8	Color Management and Standardization	562
			3.2.11	Digital Proof	562

3.2.11.1	Digital Proofing Processes	563	4.4.2.1	Concepts for Re-imageable Masters with Material Application/Ablation	643
3.2.11.2	Soft Proof	563	4.4.2.2	Re-imageable Printing Plate Systems without Material Application	652
3.2.11.3	Hard Proof	563	4.5	Computer to Print	657
3.2.11.4	Color Management Concepts	566	4.5.1	Printing Systems based on Electrophotography	658
3.2.11.5	Preflight Check	570	4.5.2	Printing Systems based on Ionography, Magnetography, and Ink Jet	664
3.2.12	Film Production and Platemaking	570	4.5.3	Design Principles of Computer to Print Systems	665
3.2.12.1	Computer to Film Systems	570	4.5.4	Digital Printing	672
3.2.12.2	Computer to Plate Systems	573			
3.2.12.3	Computer to Film and Computer to Plate in the Prepress Workflow	573	5	Printing Technologies without a Printing Plate (NIP Technologies)	
4	Computer to ... Technologies		5.1	Principles and Basic Components	677
4.1	Survey of the Technologies	581	5.1.1	Computer to Press/to Print Technology	677
4.1.1	Computer to Film	583	5.1.2	Non-Impact Printing Technologies (Overview)	678
4.1.2	Computer to Plate	583	5.1.3	Printing Process and Functional Components in NIP Technologies	679
4.1.3	Computer to Press (Direct Imaging and Computer to Print)	584	5.1.4	Digitally Controlled Image Creation in NIP Technologies	679
4.1.4	The Use of Computer to ... Technologies and Networking for the Production of Print Media	588	5.1.5	System Concepts/Architecture of Computer to Print Systems	681
4.2	Computer to Film	593	5.1.6	Inks for Non-Impact Printing Processes	685
4.2.1	Principles and Equipment	593	5.1.7	Components for Computer to Print Systems	687
4.2.2	Film Material	594	5.2	Electrophotography	689
4.3	Computer to Plate/to Cylinder/to Screen	597	5.2.1	Principle of Electrophotography	689
4.3.1	Introduction	597	5.2.2	Imaging Systems	691
4.3.2	Technology of Computer to Plate Systems for Offset Printing	598	5.2.3	Inking Unit (Developing Unit) and Toner	692
4.3.2.1	Design Principles	598	5.2.4	Fixing and Cleaning	696
4.3.2.2	Imaging Methods and Plate Punching	601	5.2.5	Conception of the Printing Unit	698
4.3.2.3	Computer to Plate Systems for Offset Printing	604	5.3	Ionography	701
4.3.3	Computer to Plate for Flexographic Printing	608	5.3.1	Printing Unit	701
4.3.4	Computer to Cylinder for Gravure Printing	611	5.3.2	Imaging System and the Principle of Ionography	702
4.3.5	Computer to Screen for Screen Printing	611	5.3.3	Printing Unit Concepts and Printing Systems based on Ionography	703
4.3.6	Computer to Plate Workflow	612	5.4	Magnetography	706
4.3.7	Rise in Quality as a Result of Computer to Plate	614	5.4.1	Principle of Magnetography	706
4.3.8	Productivity and Economic Efficiency	615	5.4.2	Imaging System for Magnetography	708
4.3.9	Printing Plates for Digital Imaging	616	5.4.3	Examples of Applications/Printing Systems	709
4.3.10	Trends in Computer to Plate	623	5.5	Ink Jet	711
4.4	Computer to Press/Direct Imaging	627	5.5.1	Overview of Ink Jet Technologies and Processes	711
4.4.1	Computer to Press/Direct Imaging with Removal of the Master for each Print Job	628			
4.4.1.1	Computer to Press/Direct Imaging Printing Systems	628			
4.4.1.2	Expansion and Comparison of Systems	638			
4.4.2	Computer to Press/Direct Imaging Printing Systems with Re-imageable Master	641			

5.5.2	Continuous Ink Jet	714	7.2.1	Cutting and Die-Cutting	782
5.5.3	Drop on Demand Ink Jet Technologies	715	7.2.1.1	Characterization of the Processes	782
5.5.4	Structure of Ink Jet Arrays	723	7.2.1.2	Cutting with Guillotine Cutters	782
5.5.5	Printing Systems based on Ink Jet Technology for Multicolor Printing (Selection)	725	7.2.1.3	Cutting Webs	789
5.6	Thermography	731	7.2.1.4	Die-Cutting	791
5.6.1	Overview of Thermography Technologies	731	7.2.2	Folding	796
5.6.2	Thermal Transfer Printing Systems	734	7.2.2.1	Characterization of the Process	796
5.6.3	Thermal Sublimation Printing Systems	738	7.2.2.2	Folding with Folding Machines	796
5.7	Electrography	742	7.2.2.3	Folding Bookbinding Sheets	806
5.8	Photography	746	7.2.3	Forwarding	811
5.9	“X”-Graphy	749	7.2.3.1	Characterization of the Process	811
5.9.1	TonerJet Printing Technology	750	7.2.3.2	Forwarding Process in Industrial Finishing	812
5.9.2	Elcography	752	7.2.4	Assembling into Blocks	816
5.9.3	Direct Imaging Printing Technology	754	7.2.4.1	Characterization of the Process	816
5.9.4	Assessment of New Types of NIP Technologies	756	7.2.4.2	Gathering	816
6	Hybrid Printing Systems		7.2.4.3	Gathering into Single-layer Blocks	821
6.1	Overview of Printing Methods and Technologies	761	7.2.5	Binding Blocks	825
6.2	Combination Variants of Hybrid Printing Systems	763	7.2.5.1	Characterization of the Process	825
6.3	System Concepts and Examples of Implementations	765	7.2.5.2	Thread-Stitching Books	826
6.3.1	Hybrid Printing Systems combining Conventional Printing Technologies	765	7.2.5.3	Perfect Binding	830
6.3.2	Hybrid Printing Systems combining NIP Technologies	765	7.2.5.4	Thread-Sealing	837
6.3.3	Hybrid Printing Systems combining Conventional and NIP Technologies	766	7.2.5.5	Wire-Stitching	839
6.3.4	Hybrid Printing Systems combining Computer to Press/Direct Imaging with NIP Technologies	768	7.2.6	Trimming	842
6.3.5	Hybrid Printing Systems combining Conventional Printing Technologies with Computer to Press Technologies	769	7.2.6.1	Characterization of the Process	842
6.4	Hybrid Techniques for In-line and Off-line Print Production	771	7.2.6.2	Trimming Book Blocks and Brochures	842
7	Print Finishing Processes		7.2.7	Edge Treatments on Books and Brochures	844
7.1	Classification of Print Finishing Processes	775	7.2.7.1	Characterization of the Process	844
7.2	Process Steps and Procedures for Print Finishing	782	7.2.7.2	Process Sections of Block Edge Treatments	845
			7.2.8	Case Making	848
			7.2.8.1	Characterization of the Process	848
			7.2.8.2	Producing Book Covers	850
			7.2.9	Book Finishing	853
			7.2.9.1	Characterization of the Process	853
			7.2.9.2	The Process Sections of Book Finishing	855
			7.2.10	Packaging	857
			7.2.10.1	Characterization of the Process	857
			7.2.10.2	Packaging of Books and Brochures	858
			7.3	Process Structuring in Print Finishing	862
			7.3.1	Basic Principles of Process Structuring	862
			7.3.1.1	Production Flow in Print Finishing	862
			7.3.1.2	Interlinking Modules in Print Finishing	863
			7.3.1.3	Temporary Storage of Folded Sheets	867
			7.3.2	Production Lines in Print Finishing (Examples)	870
			7.3.2.1	Cutting Lines for Labels	870
			7.3.2.2	Production Lines for Mailings and Folded Products	873
			7.3.2.3	Newspaper Mailroom	876
			7.3.2.4	Mailroom for Magazines	882
			7.3.2.5	Binding Lines for Multi-layer Brochures	886
			7.3.2.6	Production Lines for Hardcover	887
			7.3.2.7	Finishing Short Print Runs	891

7.3.2.8	Bag Production Systems	894	10	Comparison of Printing and Production Technologies for Print Media

8	Material and Data Flow in Print Media Production		10.1	Introduction	963
8.1	Material Logistics	905	10.2	Overview of Methods and Technologies for the Production of Print Media	965
8.1.1	Logistics around the Press	905	10.3	Production Methods and Strategies	969
8.1.1.1	Supply of Printing Plates	906	10.4	Criteria for the Selection of Printing Technologies and Production Methods	973
8.1.1.2	Paper Reel Logistics	908	10.5	Performance Criteria of Printing Systems and Trends in Print Media Production	975
8.1.1.3	Ink, Dampening Solution, and Air Supply	910	10.5.1	Quality and Productivity/Run Length	975
8.1.1.4	Waste Disposal	911	10.5.2	Productivity	976
8.1.1.5	Paper Pile Logistics for Sheet-fed Offset Presses	911	10.5.3	Production Costs per Printed Page	976
8.1.2	Logistics in Printing Companies	914	10.5.4	Trends in Print Media Production	978
8.1.2.1	Procurement Logistics in Printing Companies	915	11	Electronic Media and Multimedia	
8.1.2.2	Inventory Management in Printing Companies	917	11.1	Media Concepts	983
8.1.2.3	Production Logistics in Printing Companies	918	11.2	Data Types, Data Structures and their Applications	985
8.1.3	Logistics in Publishing Houses	920	11.2.1	Text	985
8.2	Networking and Data Flow	923	11.2.2	Graphics	986
8.2.1	Network Concepts and Interfaces	924	11.2.3	Image	986
8.2.2	Digital Workflow	926	11.2.4	Audio	989
8.2.2.1	Digital Workflow in Prepress	926	11.2.5	Video	989
8.2.2.2	Digital Workflow and Digital Printing (Computer to Press)	928	11.2.6	Animation	989
8.2.2.3	Digital Workflow: Advantages, Challenges, and Possibilities	929	11.2.7	Virtual Reality (VR)	989
8.2.3	CIP ₃ for the Computer-Integrated Manufacturing (CIM) of Printed Products	930	11.2.8	Augmented Reality	990
8.2.4	Production Management/Monitoring Systems	934	11.2.9	Multimedia	991
8.2.4.1	Purpose, Applications	934	11.2.10	Document	991
8.2.4.2	Production Monitoring Systems	935	11.3	Data Carriers	993
9	Production Strategies for Print Media		11.3.1	Hard Disk Storage Units	993
9.1	Production Concepts	939	11.3.2	Rewritable, Removable Storage Units	993
9.1.1	Strategic Orientation of Printing Companies	939	11.3.3	CD-ROM and DVD-ROM	993
9.1.2	Centralized and Distributed Production	941	11.3.4	Magnetic Tapes	994
9.1.2.1	Centralized Production at One Site	941	11.4	Networks	995
9.1.2.2	Distributed Production at Several Sites	943	11.4.1	Internet	995
9.1.2.3	Integrated Production, Interlinking of Systems	944	11.4.2	Intranet, Extranet	996
9.1.3	Print on Demand	945	11.4.3	Broad Band Networks	996
9.1.4	Personalization	948	11.5	Data Compression	998
9.2	Production Systems	952	11.5.1	Compressed Data Archives	998
			11.5.2	Compression Processes for Image Data Files	998
			11.5.3	Compression Processes for Audio	999
			11.5.4	Compression Processes for Video	999

11.6	Output Devices for Electronic Media and Multimedia	1001	13.2	Environment, Safety, Standardization	1076
11.6.1	Screen Output	1001	13.2.1	Environmental Protection in the Printing Industry	1076
11.6.2	Projection Equipment	1002	13.2.1.1	Introduction	1076
11.6.3	Stereo Output	1002	13.2.1.2	Environmental Protection in Offset Printing	1078
11.6.4	Projection Directly to the Eyes	1003	13.2.1.3	Environmental Protection in Gravure Printing	1079
11.7	Multimedia Applications	1004	13.2.1.4	Environmental Protection in Letterpress and Flexographic Printing	1080
12	Print Media and Electronic Media		13.2.1.5	Environmental Protection in Screen Printing	1080
12.1	Examples of Print Media and Electronic Media	1007	13.2.1.6	Environment-oriented Business Management	1080
12.2	The Production of Print Media and Electronic Media	1010	13.2.1.7	Legal Foundations	1081
12.3	“Electronic” Books, “Electronic” Ink, “Electronic” Paper	1013	13.2.1.8	Support and Advice for Environment-relevant Measures	1083
12.3.1	“Electronic” Books (E-Books)	1013	13.2.2	Safety Resources	1084
12.3.2	“Electronic” Ink (E-Ink), “Electronic” Paper (E-Paper)	1015	13.2.2.1	Health and Safety	1084
12.4	Market Shares and Trends	1020	13.2.2.2	International and European Directives (Laws) and Standards	1085
13	Special Topics		13.2.2.3	Safety-conscious Design	1086
13.1	History, Education, Research	1029	13.2.2.4	Requirements for Separating Protective Devices	1089
13.1.1	History of Technology (Press and Prepress)	1029	13.2.2.5	Hazard Analysis, Risk Assessment	1091
13.1.1.1	Offset Printing and Offset Printing Presses	1029	13.2.2.6	CE and GS Marks of Conformity	1091
13.1.1.2	Gravure Printing and Gravure Printing Presses	1032	13.2.2.7	Intended Use	1093
13.1.1.3	Letterpress Printing and Letterpress Printing Presses	1034	13.2.3	Industry Standards, Codes of Practice and National/International Standards	1093
13.1.1.4	The Historical Relationship of the Printing Press Manufacturers	1041	13.3	Markets and Development Trends for Print Media	1102
13.1.1.5	Prepress	1043	13.3.1	Newspaper Market	1102
13.1.2	Education and Qualifications (Career Profiles, Courses)	1048	13.3.2	Magazine Market	1105
13.1.2.1	The Printing Industry as an Employer	1048	13.3.3	Book Market	1106
13.1.2.2	Educational Requirements and Options	1049	13.3.4	Catalog Market	1107
13.1.2.3	Vocational Training	1050	13.3.5	Advertising Printing Market	1107
13.1.2.4	Course of Study	1052	13.3.6	Packaging Market	1108
13.1.2.5	Scholarships for International Study Programs	1056	13.3.7	SOHO Market	1108
13.1.2.6	Heidelberg Print Media Academy	1057	14	Appendix	
13.1.3	Science and Research (selected Examples)	1059	14.1	Explanation of Specific Terms	1115
13.1.3.1	Subjects, Methods, and Cooperations	1059	14.1.1	Glossary	1115
13.1.3.2	Inking Units	1060	14.1.2	Abbreviations and their Meaning (Selection)	1125
13.1.3.3	Printing Units	1063	14.1.3	Abbreviations for Source References Information	1128
13.1.3.4	Sheet Transfer	1067	14.2	Physical/Technical Quantities and Conversions	1130
13.1.3.5	Industrial Joint Research	1070	14.2.1	Quantities and Units in the SI-System (Selection)	1130
			14.2.2	Conversion between the SI-System and the Imperial System (Metric/Imperial)	1133

14.3	Bibliography	1134	14.5	Research Associations and Educational Institutions for the Graphic Arts Industry (Selection)	1145
14.3.1	List of References to Readings on the Chapters and Sections in this Handbook . . .	1134	14.5.1	Universities	1145
14.3.2	Selected Literature on Print Media related Topics (General Bibliography and Individual Topics)	1135	14.5.2	Research Institutes and Research Centers	1147
14.4	Standards (Selection)	1137	14.5.3	Institutions for Teaching/Training and Education	1150
14.4.1	Prepress	1137	14.6	Associations and Organizations in the Printing and Publishing Industry (Selection)	1153
14.4.2	Printing Inks	1138	14.6.1	Associations and Organizations	1153
14.4.3	Substrates	1139	14.6.2	Industrial Joint Research	1166
14.4.4	Materials (Printing Plates, Blankets)	1140	14.7	International Conferences for the Graphic Arts Industry (Selection)	1168
14.4.5	Printing Technologies and Printing Presses	1140	15	Subject Index	1173
14.4.6	Finishing	1141			
14.4.7	Quality, Quality Specifications, and Measurement Techniques	1141			
14.4.8	Safety of Machinery	1143			
14.4.9	Environmental Management	1143
